THE UNITED STATES OF AMERICA

TO ALL TO WHOM THESE PRESENTS SHALL COME:

Hunk Seeds International

Whereas, THERE HAS BEEN PRESENTED TO THE
Secretary of Agriculture

AN APPLICATION REQUESTING A CERTIFICATE OF PROTECTION FOR AN ALLEGED NOVEL VARIETY OF SEXUALLY REPRODUCED PLANT, THE NAME AND DESCRIPTION OF WHICH ARE CONTAINED IN THE APPLICATION AND EXHIBITS, A COPY OF WHICH IS HEREUNTO ANNEXED AND MADE A PART HEREOF, AND THE VARIOUS REQUIREMENTS OF LAW IN SUCH CASES MADE AND PROVIDED HAVE BEEN COMPLIED WITH, AND THE TITLE THERETO IS, FROM THE RECORDS OF THE PLANT VARIETY PROTECTION OFFICE, IN THE APPLICANT(S) INDICATED IN THE SAID COPY, AND WHEREAS, UPON DUE EXAMINATION MADE, THE SAID APPLICANT(S) IS (ARE) ADJUDGED TO BE ENTITLED TO A CERTIFICATE OF PLANT VARIETY PROTECTION UNDER THE LAW.

NOW, THEREFORE, THIS CERTIFICATE OF PLANT VARIETY PROTECTION IS TO GRANT UNTO THE SAID APPLICANT(S) AND THE SUCCESSORS, HEIRS OR ASSIGNS OF THE SAID APPLICANT(S) FOR THE TERM OF *seventeen* YEARS FROM THE DATE OF THIS GRANT, SUBJECT TO THE PAYMENT OF THE REQUIRED FEES AND PERIODIC REPLENISHMENT OF VIABLE BASIC SEED OF THE VARIETY IN A PUBLIC REPOSITORY AS PROVIDED BY LAW, THE RIGHT TO EXCLUDE OTHERS FROM SELLING THE VARIETY, OR OFFERING IT FOR SALE, OR REPRODUCING IT, OR IMPORTING IT, OR EXPORTING IT, OR USING IT IN PRODUCING A HYBRID OR DIFFERENT VARIETY THEREFROM, TO THE EXTENT PROVIDED BY THE PLANT VARIETY PROTECTION ACT. THE UNITED STATES SEED OF THIS VARIETY (1) SHALL BE SOLD BY VARIETY NAME ONLY AS SEED OF CERTIFIED SEED AND (2) SHALL CONFORM TO THE NUMBER OF GENERATIONS PROVIDED BY THE OWNER OF THE RIGHTS. (84 STAT. 1542, AS AMENDED, 7 U.S.C. 2321 ET SEQ.)

WHEAT

'W-335'

In Testimony Whereof, I have hereunto set
my hand and caused the seal of the Plant
Variety Protection Office to be affixed
at the City of Washington
this 14th day of May in
the year of our Lord one thousand nine
hundred and seventy-six

Attest:

R. J. Rollins
Commissioner
Plant Variety Protection Office
Grain Division
Agricultural Marketing Service

Earl L. Buttz
Secretary of Agriculture

APPLICATION FOR PLANT VARIETY PROTECTION CERTIFICATE

INSTRUCTIONS: See Reverse.

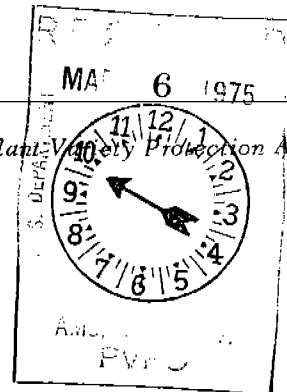

1. VARIETY NAME OR TEMPORARY DESIGNATION W-335, CI 17350	2. KIND NAME WHEAT	FOR OFFICIAL USE ONLY	
3. GENUS AND SPECIES NAME <u>Triticum aestivum</u>	4. FAMILY NAME (Botanical) Gramineae	PV NUMBER 7500064	
5. DATE OF DETERMINATION June 1972	6. NAME OF APPLICANT(S) Funk Seeds International	FILING DATE 3-6-75	TIME 10 A.M.
7. ADDRESS (Street and No. or R.F.D. No., City, State, and ZIP Code) P.O. BOX 2911 1300 W. Washington Bloomington, Illinois 61701	8. TELEPHONE AREA CODE AND NUMBER 309/829-9461	FEE RECEIVED \$ 250	BALANCE DUE \$ -
9. IF THE NAMED APPLICANT IS NOT A PERSON, FORM OF ORGANIZATION: (Corporation, partnership, association, etc.) A Company of CIBA-GEIGY, Corporation	10. STATE OF INCORPORATION New York	11. DATE OF INCORPORATION 1966	

12. Name and mailing address of applicant representative(s), if any, to serve in this application and receive all papers:

Koy E. Miskin, Manager
Wheat Research
1300 W. Washington
Bloomington, Illinois 61701

13. CHECK BOX BELOW FOR EACH ATTACHMENT SUBMITTED:

- ☒ 13A. Exhibit A, Origin and Breeding History of the Variety (See Section 52 of the Plant Variety Protection Act.)
- ☒ 13B. Exhibit B, Botanical Description of the Variety
- ☒ 13C. Exhibit C, Objective Description of the Variety
- ☒ 13D. Exhibit D, Data Indicative of Novelty
- ☒ 13E. Exhibit E, Statement of the Basis of Applicant's Ownership

14A. Does the applicant(s) specify that seed of this variety be sold by variety name only as a class of certified seed? (See Section 83(a). (If "Yes," answer 14B and 14C below.) ☒ YES ☐ NO14B. Does the applicant(s) specify that this variety be limited as to number of generations? ☒ YES ☐ NO14C. If "Yes," to 14B, how many generations of production beyond breeder seed? ☒ FOUNDATION ☒ REGISTERED ☒ CERTIFIED

The applicant declares that a viable sample of basic seed of this variety will be deposited upon request before issuance of a certificate and will be replenished periodically in accordance with such regulations as may be applicable.

The undersigned applicant(s) of this sexually-reproduced novel plant variety believes that the variety is distinct, uniform, and stable as required in Section 41 and is entitled to protection under the provisions of Section 42 of the Plant Variety Protection Act.

Applicant is informed that false representation herein can jeopardize protection and result in penalties.

INSTRUCTIONS

GENERAL: Send an original copy of the application, exhibits and \$250.00 fee to U.S. Dept. of Agriculture, Agricultural Marketing Service, Grain Division, 6525 Belcrest Road, Hyattsville, Maryland 20782. (See Section 180.175 of the regulations and rules of practice.) Retain one copy for your files. All items on the face of the form are self-explanatory unless noted below.

ITEM

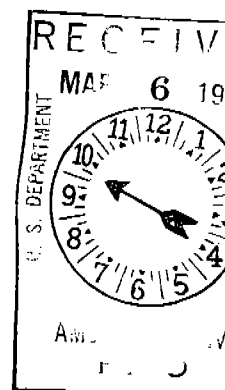

- 5 Insert the date the applicant determined that he had a new variety based on the definition in Section 41 (a) of the Act and decision is made to increase the seed.
- 13a First, give the genealogy, including public and commercial varieties, lines, or clones used, and the breeding method. Second, give the details of subsequent stages of selection and multiplication. Third, indicate the type and frequency of variants during reproduction and multiplication and state how these variants may be identified. Fourth, provide evidence on stability.
- 13b First, give any special characteristics of the seed and of the plant as it passes through the seedling stage, flowering stage and the fruiting stage. Second, describe the mature plant and compare it with a similar commercial variety grown under the same conditions, and indicate the differences.
- 13c A supplemental form will be furnished by the PVPO to describe in detail a variety for each kind of seed.
- 13d Provide complete data indicative of novelty. Seed and plant specimens or photographs of seed and plant comparisons clearly indicating novelty may be submitted. Seeds submitted may be sterile.
- 13e Indicate whether applicant is the actual breeder, the employer of the breeder, the owner through purchase or inheritance, etc.

A. ORIGIN AND BREEDING HISTORY OF W-335

W-335 was selected from a cross composite obtained from Colorado State University. One hundred eleven heads were selected from F2 plants in 1968. These were observed in head rows in 1969 and in single plots in 1970. One hundred heads were selected from one of the promising lines and planted in head rows in 1971. Eighty-eight of these rows were composited to form the original seed of W-335. W-335 has been in preliminary and advanced yield tests since that time. It was entered in Kansas State University tests in 1973 and 1974 and was in the 1974 Southern Regional Performance Nursery. The exact parentage of W-335 is not known.

Heads of W-335 are somewhat lax, with long awns, and are usually nodding at maturity; however, up to 25% of the spikes will be inclined. Taller plants with a plant type similar to the other plants are sometimes observed. The frequency of tall plants should not exceed 2%.

The bulk of the 88 rows which formed the original variety was designated Breeder seed and was increased to produce Foundation seed. Future generations of Breeder's seed will be produced from approximately 200 individual progeny rows. These rows will be maintained as individual lines with any rows that deviate from the desired type being discarded. A bulk of these rows will be designated Breeder's seed and will be used to produce Foundation seed. Recognized seed classes will be Breeders, Foundation, Registered, and Certified. Certified seed will not be eligible for recertification.

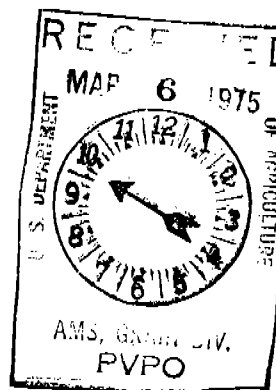

7500064

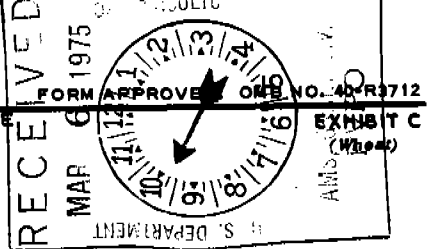

B. BOTANICAL DESCRIPTION OF W-335

Seed of W-335 hard red winter wheat is elliptical with rounded cheeks. The crease is narrow and shallow. The brush is medium length and collared. W-335 has a mid-sized embryo and turns brown-black in response to the phenol reaction. Plant characteristics include a white culm with hollow internodes and solid nodes. The spike is middense, fusiform, awned, and usually nodding at maturity. Hairs are present on the last internode of the rachis. Observed spike length and width were 91 cm and 11 mm, respectively. Glumes are midlong and midwide with rounded shoulders. The beaks are acuminate, midwide, and range from 3 to 8 mm in length. W-335 has a white coleoptile and exhibits a semi-erect juvenile growth habit.

W-335 is shorter than most hard red winter wheats available but not as short as some. Observed heights were as follows: Scout 66-37 in.; Parker-35 in.; Sturdy-31 in.; W-335-34 in.; Satanta is of similar height; however, W-335 does not have the soilborne mosaic virus resistance that Satanta possesses. W-335 is later than Parker and Sturdy and usually matures at about the same time as Gage or Lancer, both standard height varieties.

OBJECTIVE DESCRIPTION OF VARIETY
WHEAT (TRITICUM SPP.)

VARIETY NAME OR TEMPORARY
DESIGNATION

W-335

Place the appropriate number that describes the varietal character of this variety in the boxes below.
Place a zero in first box (e.g., or) when number is either 99 or less or 9 or less.

1. KIND:

1 = COMMON 2 = DURUM 3 = EMMER 4 = SPELT 5 = POLISH 6 = POULARD 7 = CLUB

2. TYPE:

1 = SPRING 2 = WINTER 3 = OTHER (Specify) _____ 1 = SOFT 3 = OTHER (Specify) _____
2 = HARD

1 = WHITE 2 = RED 3 = OTHER (Specify) _____

3. SEASON - NUMBER OF DAYS FROM EMERGENCE TO:

FIRST FLOWERING LAST FLOWERING

4. MATURITY (50% Flowering):

NO. OF DAYS EARLIER THAN 1 = ARTHUR 2 = SCOUT 3 = CHRIS
 NO. OF DAYS LATER THAN 4 = LEMHI 5 = NUGAINES 6 = LEEDS

5. PLANT HEIGHT (From soil level to top of head):

CM. HIGH
 CM. TALLER THAN 1 = ARTHUR 2 = SCOUT 3 = CHRIS
 CM. SHORTER THAN 4 = LEMHI 5 = NUGAINES 6 = LEEDS

6. PLANT COLOR AT BOOTING (See reverse):

1 = YELLOW GREEN 2 = GREEN 3 = BLUE GREEN

7. ANTHUR COLOR:

1 = YELLOW 2 = PURPLE

8. STEM:

Anthocyanin: 1 = ABSENT 2 = PRESENT Waxy bloom: 1 = ABSENT 2 = PRESENT
 Hairiness of last internode of rachis: 1 = ABSENT 2 = PRESENT Internodes: 1 = HOLLOW 2 = SOLID
 NO. OF NODES (Originating from node above ground) CM. INTERNODE LENGTH BETWEEN FLAG LEAF AND LEAF BELOW

9. AURICLES:

Anthocyanin: 1 = ABSENT 2 = PRESENT Hairiness: 1 = ABSENT 2 = PRESENT

10. LEAF:

Flag leaf at booting stage: 1 = ERECT 2 = RECURVED Flag leaf: 1 = NOT TWISTED 2 = TWISTED
3 = OTHER (Specify): _____
 Hairs of first leaf sheath: 1 = ABSENT 2 = PRESENT Waxy bloom of flag leaf sheath: 1 = ABSENT 2 = PRESENT
 MM. LEAF WIDTH (First leaf below flag leaf) CM. LEAF LENGTH (First leaf below flag leaf):

D. DATA INDICATIVE OF NOVELTY

W-335 is shorter than most hard red winter wheats but is taller than Sturdy and Caprock. Its height is between that of Parker and Satanta. It is usually shorter than Parker and differs from Parker in response to Hessian fly, mixing time as determined by the mixograph, flour yield, and maturity (see attached tables). W-335 is later maturing than Sturdy and Caprock and similar to Gage and Lancer, both taller varieties. ~~Because of its height,~~ W-335 would be considered most similar to Satanta. It can be distinguished from Satanta by two major characteristics; it does not have the erect flag leaf nor soilborne mosaic virus resistance possessed by Satanta. The following tables present yield data, agronomic data, and quality data for W-335 and some widely used check varieties:

YIELD DATA FOR W-335

E. STATEMENT OF THE BASIC OF APPLICANTS' OWNERSHIP

W-335

The novel plant variety described herein was developed by employee of applicant whose scope of employment included the development of new varieties of wheat.

'W-335' wheat novelty

'W-335' is most similar to 'Satan's' [~~because of its height~~] 'W-335' differs from 'Satan's' by having a recurved flag leaf and susceptibility to soil-borne mosaic virus. 'Satan's' has an erect flag leaf and resistance to soil-borne mosaic virus.
